

SUMMARY

Backend-leaning full-stack engineer with ~7 years building and operating distributed systems in C#/.NET and Go. Comfortable from API and database design through to CI/CD and production observability. I like turning fuzzy requirements into reliable services, and I care about clean domain models, sensible tests and fast feedback loops. Open to remote and hybrid roles.

EXPERIENCE

Senior Software Engineer · Northwind Systems2021 – Present

- Lead backend on a multi-tenant SaaS platform (ASP.NET Core, PostgreSQL, Redis) serving thousands of daily users.
- Designed and shipped an event-driven billing service in Go, cutting reconciliation errors and manual work.
- Owned the CI/CD pipeline (GitHub Actions, Docker, Kubernetes) and the on-call observability stack.
- Mentored two mid-level engineers and ran the team's API design and code-review standards.

Software Engineer · Lumen Retail2018 – 2021

- Built REST and gRPC services in .NET for an e-commerce order pipeline integrating 3rd-party logistics.
- Migrated a monolith module to independently deployable services, improving release cadence.
- Introduced integration tests and feature flags, reducing regressions on checkout flows.

Junior Developer · Atlas Software2017 – 2018

- Full-stack work on internal web apps (C#, SQL Server, JavaScript) for operations teams.
- Automated recurring reports, freeing several hours of manual work each week.

CORE SKILLS

Languages	C#, Go, SQL, TypeScript
Backend	ASP.NET Core, REST, gRPC, EF Core
Data	PostgreSQL, SQL Server, Redis
Cloud / Ops	Docker, Kubernetes, Azure, GitHub Actions
Practices	TDD, CI/CD, DDD, observability

TOOLS

.NET

Go

PostgreSQL

Docker

Kubernetes

Azure

RabbitMQ

Grafana

EDUCATION

BSc in Computer Science

University of Porto · 2013 — 2017

LANGUAGES

English (C2) · Portuguese (native) · Spanish (B1)
